

ELITE

RADIO TRANSMITTER

The ELITE is one of the largest in our belpack lineup with room for up to four dual-axis joysticks, six single-axis paddles, and MANY toggle switches and pushbuttons, alongside other larger rotary switches, displays, etc. The enclosure is ergonomically designed to accept an integral padded shoulder strap, and sits horizontally at waist level, positioning all the controls at a comfortable working height. There is a protective lip that guards all the joysticks and switches from inadvertent operation.

The enclosure is polypropylene copolymer, and the electronics are all high-spec SMT: together, these remotes are durable at any temperature – arctic or equatorial. Twenty hours of actively transmitting operating life is a typical minimum with our NiMH batteries, but the ELITE has the flexibility to go to high-capacity lithium with several charging options.

The ELITE is only available to OEM's for production applications. Please contact us for no-cost application design help.

Standard & custom configurations available to fit any application.

All Kar-Tech radios include:

- Intelligent power management
- EasySync RF teach
- Two-way communication
- Actively protected & monitored I/O
- Real-time feedback
- Active safety checking

Frequency:	433 MHz	900 MHz	2.4 GHz		
Range (up to):	300'	1000'	2500'		
Power Source:	RECHARGEABLE	AA BATTERIES	AAA BATTERIES	LIPOLY	NIMH
Charging:	USB	PAD	CAN	SWAP
